1:6 newcomer Custom Studio is normally known for their action figure sets that are based on video game characters (Joe C. Riley and Bradley Peterson to name a few). That's why I was a little surprised when they told me that their next set would be a Leather Jacket and Pants Set. The set consists of a black leather jacket, black leather pants, leather belt, and black cloth t-shirt (sorry, no boots).

The possibilities are limitless on what you can create with this set, from a grungy looking biker to a bullet bike riding hero. I was thinking it might work for a Terminator II/III style figure too, but not too sure if it is cut big enough for these new "muscle" bodies coming out, though. It's a great set nonetheless.

ETA: January 2012
